

Launch Event: Data Navigator

12 May 2021, 16:00-17:00 CET

Are health inequalities between men and women narrowing?

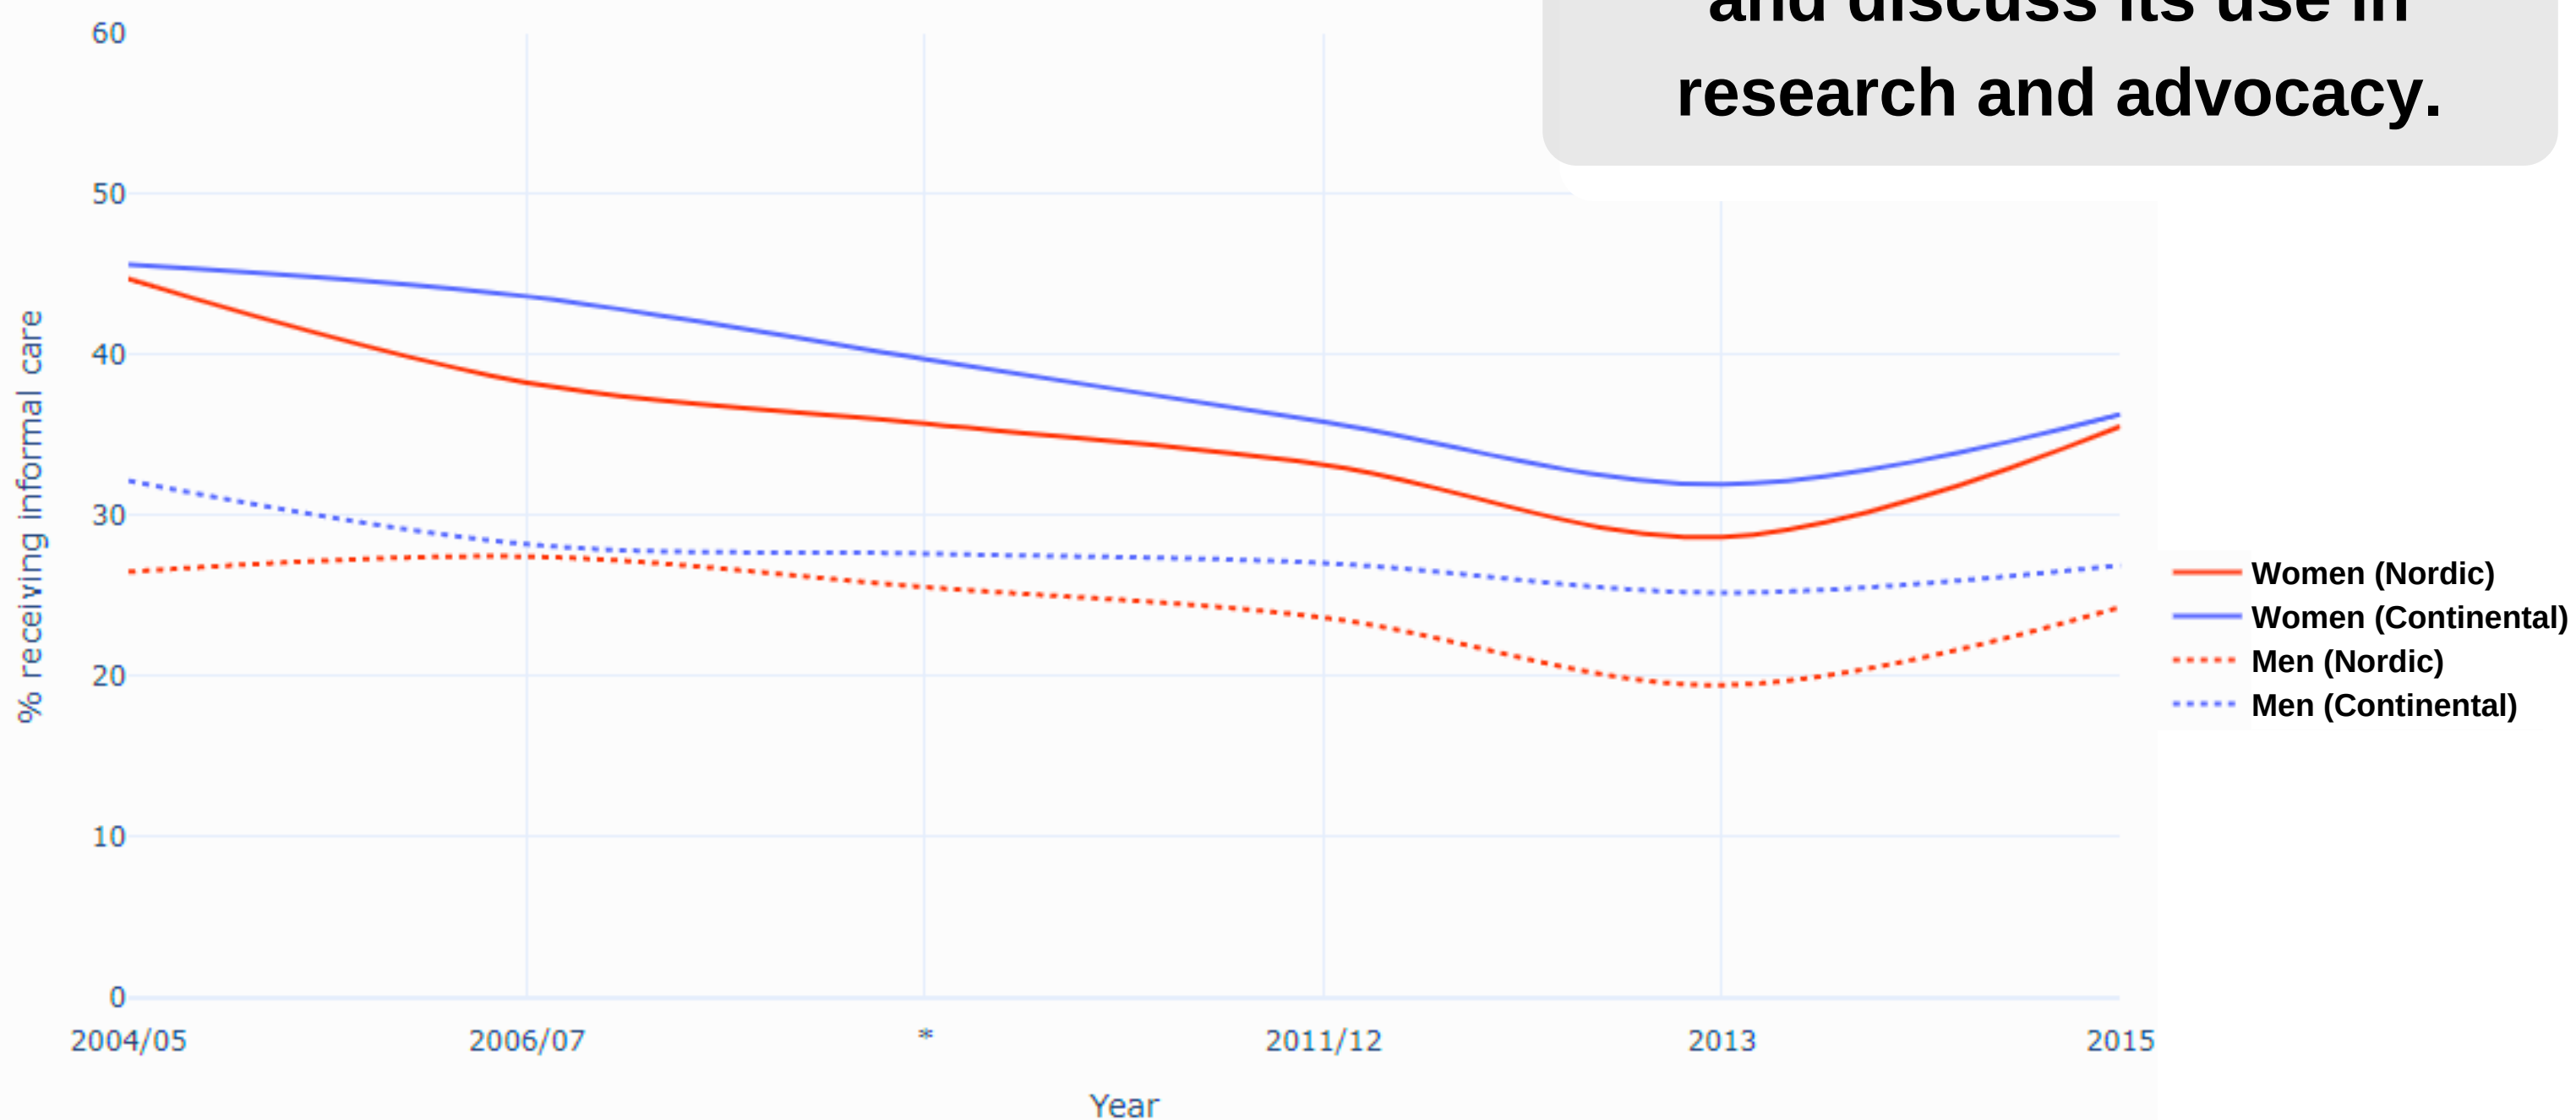

How are gender inequalities in health and care tied to socioeconomic conditions?

Are inequalities in informal caregiving decreasing over time?

The Data Navigator is a recently launched open-access tool that compares gender and socioeconomic differences in health and long-term care use for community-dwelling older people (aged 65+ years) in Europe over time.

The FutureGEN team will introduce the Data Navigator and discuss its use in research and advocacy.

Prevalence of informal care receiving by gender (Aged 65+ years)

With special input from Sounding Board members:

Eileen Rocard
(OECD)

Stecy Yghemonos
(Eurocarers)

Francesca Bettio
(University of Siena)
